Profile

I am eager to learn new things and work efficiently in collaboration with diverse individuals. I have a strong background in mathematics and IT. I have completed a degree in Information Technologies from LAB University of Applied Sciences. During my military service, I worked as a clerk and 3D modeling support staff for a virtual training environment. I am adaptable and thrive in different work environments, from physically demanding outdoor tasks to precision-focused office work.

Education

LAB University of Applied Sciences

Bachelor of Engineering, Information Technology, 2022–2025
